CAREER OBJECTIVE

Enthusiastic Web Developer with hands-on experience in frontend development and a passion for building responsive, user-friendly applications. Looking for an opportunity to contribute to meaningful projects while continuously improving my technical and professional skills.

SKILLS

- **Frontend:** HTML5, CSS3, Tailwind CSS, DaisyUI, JavaScript (ES6+), React.js,
 - **Backend:** Node.js, Express.js, REST API Development
 - **Database:** MongoDB, Firebase (Auth, Firestore)
 - **Frameworks/Libraries:** React Hook Form, React Query, React Router, DaisyUI, JWT
 - **Tools:** Git, GitHub, Chrome DevTools, VS Code, Figma, Photoshop, Vercel, Surge
-

PROJECTS

ToyTopia – Kids Toy Marketplace (Frontend)

[Live Preview](#) | [Client code](#)

Admin Credentials

Email: admin@gmail.com **Password:** Admin123

A dynamic and visually engaging kids' toy marketplace where users can explore, filter, and purchase toys. Built with React workflows, Firebase authentication, and a fully responsive UI for smooth browsing across devices.

- **User-Friendly Authentication:** Firebase Email/Password & Google Login with session persistence.
- **Interactive Toy Browsing:** Dynamic JSON-based toy listings with detail pages and exploration.
- **Smart Navigation:** Protected routes, dynamic page titles, and profile update using Firebase.

Technology: React, Tailwind CSS, Firebase Auth, React Router, Swiper, SweetAlert2.

PlateShare– Community Food Sharing (Full Stack)

[Live Preview](#) | [Client code](#) | [Server Code](#)

Admin Credentials

Email: admin@gmail.com **Password:** Admin123

PlateShare is a community food-sharing platform where users can donate surplus food, browse available items, and request food through a streamlined approval workflow. The system ensures secure authentication, smooth CRUD operations, and a responsive, accessible user experience.

- **Secure Authentication & Persistence:** Firebase Authentication (Email/Google) with protected private routes so logged-in users remain on private pages after reload.
- **Robust Food CRUD:** Donors create/update/delete food items stored in MongoDB; includes validation, modal edit flow, and confirmation prompts.
- **End-to-End Request System:** Visitors request food via modal form; owners view requests in a table and **Accept / Reject** — accepting marks request accepted and food status donated.

Technology: React, Express, MongoDB, Firebase, React Router, Tailwind, SweetAlert2, AOS/Framer Motion.

LANGUAGES

Bangla: Native, English: Comfortable.
